**A Must-Have
Tool for any
Machine Shop
or Fabricator**

Fowler mini-MAG Protractor

This is a precision instrument used for measuring angles in which any of its four surfaces may be utilized.

- * Zero can also be set at any angle so that the relative angle between two surfaces can be measured.
- * Can be set to read absolute zero, so it may be used as a leveling device.
- * The Hold feature freezes the displayed reading while retaining the original zero datum.
- * Perfect for setting pinion angle.
- * Instantly determine valve angle with engine in car and heads fully assembled.
- * Perfect tech tool for checking valve angle or angle milled heads.
