

Cylinder Wall Thickness Gauge

- * Checks block for "CORE SHIFT" or dangerously thin cylinder walls before spending time & money on an inferior block
- * Fits cylinder bolt holes or water jacket holes
- * Tool is fast & accurate to .001"
- * Easily does the job of an ultrasonic tester at a fraction of the cost

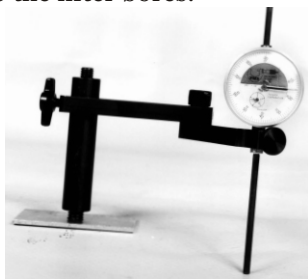

Magnetic Deck Bridge

- * Anodized aluminum construction
- * Three holes drilled & tapped for collet locations
- * Collet, 1" Extension, Screws & Washers for attaching calipers included (Additional collets and extensions available)
- * Accurately milled to accept dial calipers, which allows operator to check stroke within .001"
- * Magnetic base secures fixture to block & frees operator's hands
- * Perfect for accurately locating top dead center & many other functions such as crankshaft end play
- * 4 3/16" inside span covers virtually all cylinders
- * Dial Indicator & Dial Calipers available separately

This fixture is perfect for degreasing a camshaft because when the unit is screwed into the deck surface, the stem of the indicator is always parallel to the lifter bores.

- * Tool is machined & black anodized
- * Complete with 5" extension for reaching down to filter
- * 1/2" & 7/16" threaded shaft fits most blocks (other threads available upon request)
- * Dial Indicator is available but NOT included

Block Mounted Indicator Fixture
