

If you own a RIMAC Spring Tester, this fixture is a MUST. This adaptor allows the operator to check valve springs quickly with .001" accuracy.

Indicator Adaptor for RIMAC Spring Tester

Eliminates the time and hassle of trying to read inaccurate scale or fumbling with preset snap gauges to measure spring height

Guaranteed to repeat to .001"

Adapter comes with 2" standard for fast, accurate calibration

Check a whole set of springs in the time you waste trying to read scale on one spring

Available with or without indicator

Complete with instructions and mounting hardware

Durable anodized aluminum construction ensures years of service

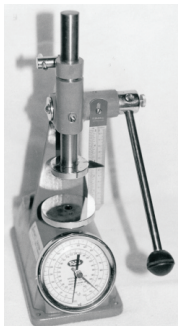

PMS Mini Spring Tester

For the last 20 years we have carried (and will continue to carry) the RIMAC Spring Tester. It has stood the test with digitals, etc., and remains the industry's standard in both NASCAR and NHRA. However, you also know that the price has gone up 100% in the same time period. We get calls all the time for a good economic compromise – so here it is!

You can use this unit in a vise or under a drill press, and it is close to accurate (+ or - 10 lbs.). This tool is perfect for comparison or finding a weak spring and it does repeat very well.

**Available in 600 lbs or 1000 lbs.
(600 lbs. in 10 lbs increments)
(1000 lbs. in 20 lbs. increments)**

RIMAC Valve Spring Tester

This is the same spring tester used by all major sanctioning bodies. It is without a doubt the finest tester on the market.
